Art Unit: 1724

In the communication filed October 25, 2000, Paper No. 13, Applicant elected Group I, drawn to a filter material and method for its production. A further restriction, under 35 U.S.C. 121 and 372, is now required.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1:

Group I(a), claims 10-13, drawn to a method for producing a cellulosic material; and

Group I(b), claims 18-23 and 30-33, drawn to a filter material comprising a sheet-like matrix.

The special feature linking the above noted inventions is a product having adsorbed thereon one or more aliphatic carboxylic acids having hydrocarbon chains consisting of 8 to 20 carbon atoms, which product is not patentable as evidenced by Novak (U.S. Patent No. 1,958,202; see page 1, lines 93-99); and therefore, does not provide a contribution over the prior art.

In accordance with 37 CFR 1.499, Applicant is required, in response to this office action, to elect a single invention to which the claims must be restricted.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to I. Cintins whose telephone number is (703) 308-3840. The examiner can
